LeadingThemes

Hey!

This is our first free Prestashop theme. It works with 1.4.x Prestashop versions and it's responsive. If you need more Prestashop themes, or you just want to contact us, visit LeadingThemes.com.
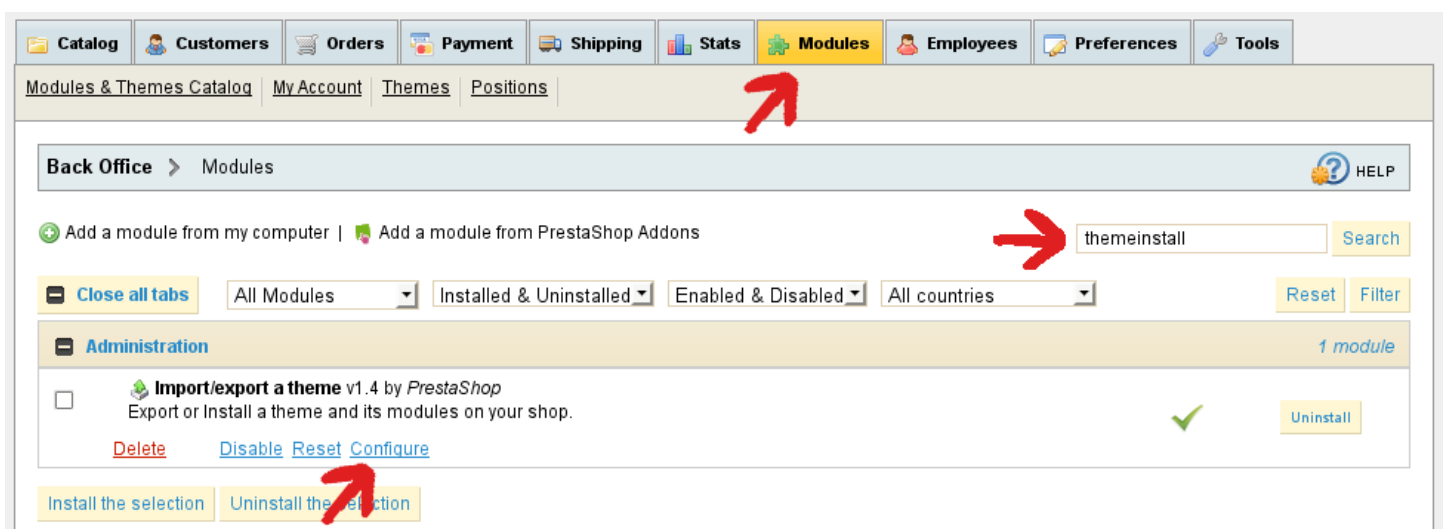

Installation

There are two ways to install a theme in Prestashop and we are going to show them both. This is the first one, by using a default module, called "Import/Export A Theme".

We'll just assume you've already extracted the zip file and you're ready to install our theme.

Step 1 – Install the "Import/Export A Theme" module

Go to your administration panel and click the Modules tab. There should be a search box. Write themeinstall into the search box and click Search. If you already have that module installed, click Configure. If you don't have it installed, click Install module and then click Configure.

Step 2 – Import the Apparel theme

Now we just have to select our file and import the theme. After you clicked the Configure link, as described above, under the "Import from your computer" box, select the theme file from your computer and click Next, as shown below.

Step 3 – Finish the installation

After you click the Next button, as described above, just leave all settings default, as they already are, and click Next, until you see a message that the theme has been successfully installed.

Important note: We used .png extension for our logo, so you have to upload your logo in png format to your **img/** folder. If you are not able to upload it from your Administration Panel, just upload it manually via FTP. You can find our default "Clothes" logo in the **manual_install/img/** folder. We also provided a PSD file, so you can edit it and have the name of your company as your logo.

Now you just have to activate this theme. Go to **Modules →
Themes** and select Apparel as your default theme. That's all.
Your theme should work now.

If you want, you can also install the theme manually.

Step 1 – Upload files to their respective folders on your server

There are three folders inside our manual_install folder – img, modules and themes folders. You have to upload the contents of those folders inside the same folders on your server. So, all files and folders inside the module folder should be uploaded to your modules folder on your server, etc.

Step 2 – Install custom modules

We made three custom modules for this theme – **blocklogo, homeslideshow** and **blocktopmenu**.

Go to **Administration Panel → Modules** and install them.

Step 3 – Order your modules

In order to work properly, this theme has to have the following order of installed modules. Make sure you order them as shown on the screenshot below.

		Homepage content - 2 modules *(Technical name: home)*			☐
1	▼	🖼 **Home Slideshow** v1.0 Displays a slideshow on your home page	🖉	🗑	☐
2	▲	🏠 **Featured Products on the homepage** v0.9 Displays Featured Products in the middle of your homepage.	🖉	🗑	☐

		Top of pages - 9 modules [A hook which allow you to do things a the top of each pages.] *(Technical name: top)*			☐
1	▼	💵 **Currency block** v0.1 Adds a block for selecting a currency.	🖉	🗑	☐
2	▲▼	💬 **Language block** v1.1 Adds a block for selecting a language.	🖉	🗑	☐
3	▲▼	🔍 **Quick Search block** v1.0 Adds a block with a quick search field.	🖉	🗑	☐
4	▲▼	👤 **User info block** v0.1 Adds a block that displays information about the customer.	🖉	🗑	☐
5	▲▼	⚠ **Pages not found** v1.0 Display the pages requested by your visitors but not found.	🖉	🗑	☐
6	▲▼	🔎 **Search engine keywords** v1.0 Display which keywords have led visitors to your website.	🖉	🗑	☐
7	▲▼	📋 **Categories block** v2.0 Adds a block featuring product categories.	🖉	🗑	☐
8	▲▼	🖼 **Block Logo** v1.0 Places the logo into top hook	🖉	🗑	☐
9	▲	🖼 **Top horizontal menu** v1.0 Adds store categories to a horizontal menu	🖉	🗑	☐

That's all. The Apparel theme should work now. Please have in mind that this is a free theme, and as such doesn't come with support.

If you have any other questions or need custom work, feel free to drop us an email or visit our site.
